

What does geometry reveal about God?			God is revealed as the Master Designer when geometry is used as a means of describing the attributes of the physical world.		
5		Graph points in the first quadrant of the coordinate plane to solve real-world and mathematical problems (5.G.1,2)		9.2, 9.3, 9.4	
		Classify two-dimensional figures into categories based on their properties of sides and angles (5.G.3,4)		11.1, 11.2, 11.3, 11.4	
How can we quantify our findings in a way that pleases God			God has at various times commanded men to count, measure, and record their findings.		
5		Use basic operations to solve problems using a line plot to display a data set of measurement in fractions of a unit (halves, fourths, and eighths) (5.MD.2) Find the mean, median, mode and range of a given set of data		9.1
